#### EXPERT MECHANICAL ENGINEER DELIVER NEW BUILD PROCESSING PROJECTS

**Townsville.**

This respected engineering consultancy provides technical engineering and management support to some of Queensland's largest heavy industrial projects.

Their strong regional presence and reputation for delivering the highest standard of work in the resources market, has led to major projects wins in the coming financial year.

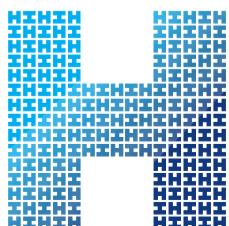

A Mechanical Engineer with the capabilities to lead projects from the design/documentation phase through to management support during construction is crucial to the Townsville business.

Your proven success in delivering large scale process and mining infrastructure projects is essential.

A professional and target driven approach will open the doors to numerous career opportunities with this employer of choice.

#### TALENTED CIVIL PROJECT ENGINEER ENSURE SUCCESS OF MAJOR PROJECTS

**Townsville/North Queensland.**

Recently awarded several major projects in North Queensland, this civil contractor is in the enviable position of being able to look forward to major growth in the new financial year.

Newly awarded projects need newly created site teams - an opportunity now exists for a qualified Civil Project Engineer with experience on main roads, bridges and subdivisions to further establish their career.

Success will be achieved through your ability to not only manage programmes and specifications, but to also communicate a sense of urgency and professionalism to all subcontractors associated with the project.

Successfully delivering the project KPI's will see you advance your career whilst being financially rewarded with an industry leading package.
